PROFESSIONAL SUMMARY

Informatics graduate from Institut Teknologi Nasional Bandung with a strong interest in Data Analysis, Machine Learning, and data-driven decision making. Experienced in data processing, system analysis, and developing machine learning models, including NLP-based emotion detection using IndoBERTweet-BiLSTM. Skilled in Python, SQL, and data analysis tools, with the ability to transform raw data into meaningful insights. A fast learner, analytical thinker, and team-oriented individual who enjoys solving problems using technology and data.

EDUCATION

Institut Teknologi Nasional Bandung	2021 - 2026
Bachelor's Degree in Informatics 3.50/4.00	
SMA Santa Angela Bandung	2018 - 2021
Science Major	

WORKS EXPERIENCE

Program Director Streaming, Unileague Apr 2026 – now

- Managed the preparation of football match live streaming on YouTube using OBS.
- Coordinated with the production team regarding the placement of the main camera and moving cameras to ensure optimal match visuals on the switcher.
- Ensured the live streaming broadcast ran smoothly and provided a comfortable viewing experience for the audience throughout the match.
- Conducted technical monitoring during live streaming to minimize audio and visual issues.

IT Intern, PT Bukit Asam Pelabuhan Tarahan Jun 2024 – Aug 2024

- Performed troubleshooting for hardware and software issues to ensure smooth operational activities.
- Assisted server maintenance and system issue analysis.
- Conducted analysis of the existing helpdesk ticketing system to identify inefficiencies and recommend improvements.
- Helped document system workflows and technical issues for internal reporting.

Content Creator (Copywriter, Editor, Videographer), OneRed Nov 2022 - Jun 2023

- Analyzed audience engagement and optimized digital content strategy using SEO techniques.
- Produced multimedia content including articles, videos, and visual materials.

Videographer & Video Editor, BinaBola Aug 2024 – Jan 2025

- Produced and edited educational football training videos for digital learning modules.

PROJECTS

Emotion Detection Using IndoBERTweet-BiLSTM (Thesis Project)

- Developed a multilabel NLP model to detect hate speech and negative emotions from Twitter data.

- Utilized IndoBERTweet combined with BiLSTM architecture to improve classification performance.
- Implemented the model into a web-based public opinion analysis application.
- Conducted dataset preprocessing, feature extraction, model training, and evaluation.

Smart Parking Car (IoT Project)

- Developed a smart parking monitoring system that detects parking space availability.
- Integrated sensors and microcontroller to collect real-time data.

Smart Cat Feeding

- Designed an automated cat feeding system integrated with Google Voice Assistant.

Astra Quest (AR Game Development)

- Developed an Augmented Reality game using Unity that converts learning cards into interactive 3D objects.

ORGANIZATION EXPERIENCE

Coordinator 2, Gereja Mahasiswa Bandung

Jul 2023 – Agt 2024

- Coordinated multiple divisions and supervised project execution.
- Planned annual event schedules and managed team collaboration.

Media & Communication Member, Gereja Mahasiswa Bandung

2022 - 2023

- Managed social media content and designed visual communication materials.

ACHIEVEMENTS

PROKIMNAS Research Grant Recipient

Nov 2023 – Feb 2024

- Conducted research on machine learning implementation for Smart Cart using Object Detection segmentation.
- Configured Raspberry Pi for system development.

TECHNICAL SKILLS

Languages: Bahasa Indonesia (Native), English.

Programming & Data Analysis: Python, C+, Pascal, SQL, Data Cleaning, Data Visualization.

Tools: VS Code, Pycharm, Jupyter Notebook, Figma, Microsoft Office, Microsoft Excel.

Others: Design UI/UX, Research & Data Interpretation, System Analysis, and Problem Solving
